

DEKKO CONCRETE

Modern Firepit Collection

DEKKO CONCRETE is a team of dedicated professionals who design and fabricate sustainable lightweight concrete products. Our reputation is built on the quality of our products and our simplistic yet elegant designs.

Each product is hand made by DEKKO professionals and receives the same care and attention to detail that can only be achieved through hand craftsmanship.

So enjoy our 2013 collection, its designed by us. Not world famous designers, but passionate ones who work closely with an in-house team of experienced professionals. It's that simple really. We just want to help you find the design that's perfect for you.

Our Material

Our revolutionary lightweight material looks and feels like concrete, with an authentic rich texture. All products are handmade in North America by DEKKO professionals. Each of our hand cast concrete products provide outstanding strength and weight ratios. No foundation or structural framing required. Our lightweight composite makes it easy to handle if moving.

Quality Check by DEKKO

Quality. It's a word you hear a lot around DEKKO. In fact, it's kind of an obsession for us. We do everything ourselves at DEKKO, from fiber development to delivery of the final product and we want our quality to be the best. What you get with a product from DEKKO is hand crafted in our facility from start to finish... the results are exceptional and durable.

How do I ignite a DEKKO fire pit?

Our Fire pits utilize a manual key valve to control the gas flow and are lit with a barbeque lighter or match. DEKKO fire pits can be equipped with remote control ignition for an additional cost.

Are covers for protection recommended?

DEKKO concrete can withstand all weather conditions and be left outside year round. Covers are recommended for protecting the burner from debris during winter months.

Can I Order a Custom Size?

Although we've made some amazing products, if you have a unique design or idea we have limitless design possibilities.
