FABRICS

# TEXTILES

No matter which type of textile you choose for your cushions, Gloster only use the best outdoor textiles that are manufactured using 100% solution dyed acrylic yarns for maximum resistance to the fading and degrading effects of sunlight. All textiles are finished with a water-repellent coating on the surface to reduce water absorbency.

# TEXTILES

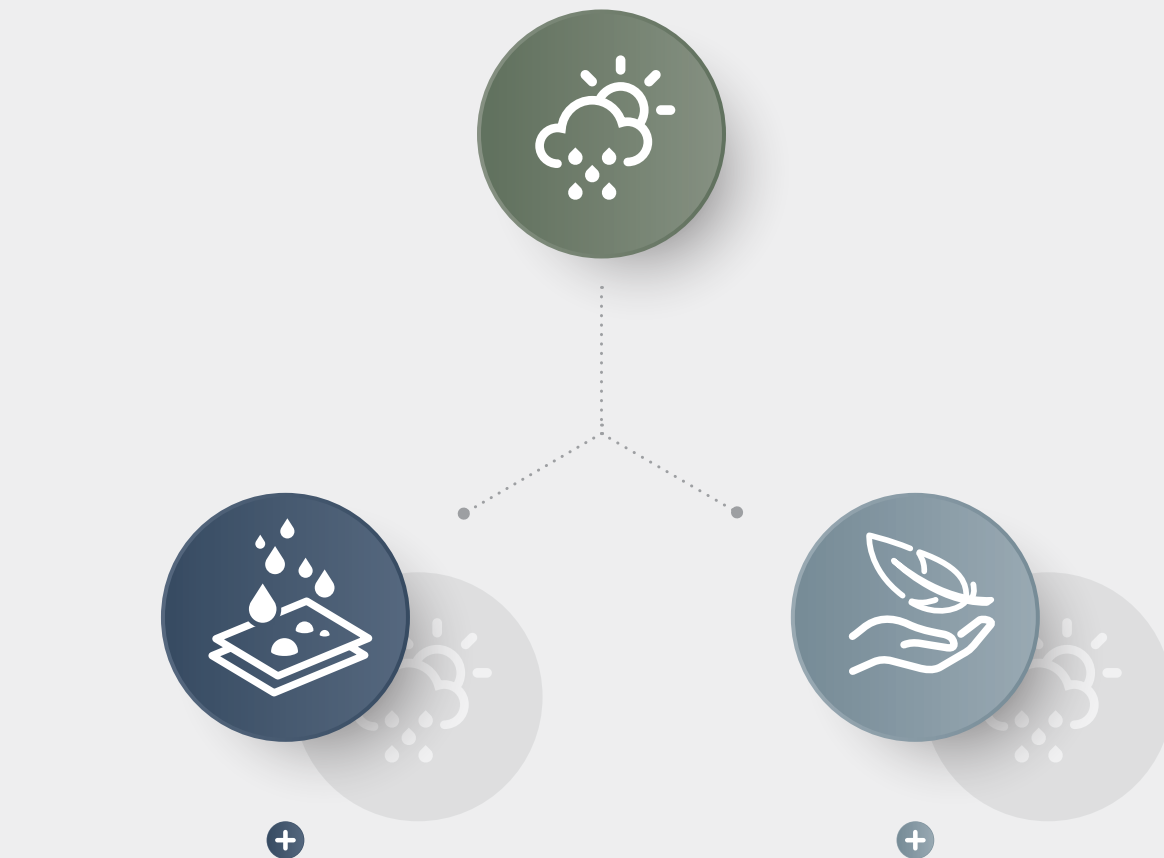

No matter which type of fabric you choose for your cushions, Gloster only use the best outdoor fabrics that are manufactured using 100% solution dyed acrylic yarns for maximum resistance to the fading and degrading effects of sunlight. All fabrics are finished with a water-repellent

coating on the surface to reduce water absorbency. If the fabric does become wet from prolonged exposure, they will come to no harm, and the fabrics will dry out naturally. Gloster cushions are offered with fabrics that fall into three distinct groups:

## OUTDOOR PERFORMANCE

Offered in a wide selection of stylish and sophisticated fabrics with a soft hand, our Outdoor Performance cushions use the softest, most luxurious fillings that give

the feel of the most comfortable indoor furniture. A highly water-resistant barrier beneath the outer fabric cover protects the fillings, keeping drying times to a minimum.

### MAXIMUM WATER RESISTANCE

For maximum water resistance, a selection of Sunbrella® Rain cover fabrics features a water-resistant coating that is applied to the back face, helping prevent water travelling beyond the surface of the fabric. Although not offering quite the same soft hand as our other fabrics, these water-resistant fabrics are very practical and quick drying. The fillings inside the cushion are engineered using open cell materials to allow for maximum air circulation, helping to speed up the drying process even further.

### MAXIMUM SOFT TOUCH

Combining with all the benefits present in Outdoor Performance cushions, Gloster offer this range of exclusive, knitted outdoor fabrics, the first to be produced using 100% solution dyed acrylic yarns. These knitted fabrics offer the ultimate in terms of softness, giving a sumptuous cosy feel, while the inherent stretch allows for the perfect fit to even the most demanding of cushion shapes. The Wave fabrics feature a unique, 3D knitted structure giving levels of texture and softness unparalleled in outdoor fabrics.

## SPECIAL FEATURES

### WATER RESISTANT TEXTILES

Sunbrella Rain is a water resistant version of the standard Sunbrella upholstery fabrics. Rain fabrics are treated with a weatherproof coating that minimises water absorption and enables the cushion to dry out much faster than standard fabrics. Rain fabrics can be completely moisture-free within minutes after a simple wipe-down. When wet, the fabric threads expand slightly, meaning any water simply beads up on the fabric surface, rather than seeping into the cushion filling and leaving behind residual moisture. Rain fabrics are a little stiffer than the traditional Sunbrella fabrics, but they share the same market-leading performance in terms of durability, fade resistance, and ease of cleaning - making them the ideal choice for all outdoor living and dining spaces.

### RECYCLED CONTENT TEXTILES

Sunbrella® recycled fabrics combine up to 50% post-industrial recycled Sunbrella® fibre with virgin Sunbrella® fibre to achieve vintage charm, rich colouration, soft feel and excellent performance. Due to the nature of the recycled content, Sunbrella® recycled yarns may exhibit random colour specks and shade variation. These slubs can sometimes be a contrasting colour.

The recycled and virgin fibres are blended to help ensure that the product meets stringent Sunbrella® performance standards. The recycled content is collected from the Sunbrella® manufacturing facility, where the waste is segmented into colour groups, reduced back to its fibre state and finally mixed with Sunbrella® virgin fibre before making its way through the manufacturing process. Due to the recycled nature of this fabric, the colour may vary between production batches and large sections of recycled yarns may run sporadically throughout the fabric. The presence of these recycled yarns should not be interpreted as imperfection, but as part of the character of the recycled fabric.

### DIRECTIONAL TEXTILES

Fabric will run front to back on the cushion as you see it in the swatch book, fold-out swatch card or website configurator. This standard on some sectional corner or wedge units will cause a directional fabric to be sewn diagonal. Please contact your sales rep or customer service representative if you have any questions.
